Dear Our Business Partners,

Greetings with full of hope and affection

I would like to wish, first of all, hundreds of thousands of business partners the best wishes, and I hope you reach new milestones with new sales.

Silva continues to develop. After Silva Chemistry, Silva IT has begun its operations. We will continue to reach new milestones with all of our innovations and services. We continue to realize our dreams. We want you not to give up on your dreams. We have given special importance to trust, sincerity, and family connections - the cornerstone of Silva - and we will continue to do so. By using a DNA spiral in our corporate logo, there is a family value in Silva's natural and organic structure. This special mission exists in the brand's genes. Our dear business partners, please remember this value.

Dear Business Partners,

We continue to innovate with all our motivation and aims. Just like every category in our catalog, we aim to make a tremendous impact with special products, proven actives, and personal care categories. Positive feedback from you and consumers and the benefits of our products

make us extremely happy. They motivate us to make things better. I thank you for your trust and feedback.

As of 2021, Silva IT has begun its operations. While e-commerce has gathered pace, I believe our business partners will take their places on this platform. Having a big market volume in Turkey, e-commerce continues to grow with impressive momentum. The pandemic changed our shopping habits completely, and online shopping will continue to grow. With our trustworthy e-commerce solutions, I want you to know that we support you in the IT sector. I hope our business partners will take their place on this platform.

I extend my respect and sympathy to every partner. I wish your success lasts forever and may your earnings be plentiful.

Murat Karapıçak, Silva CEO

Silva, with 100 percent Turkish capital, was founded in 2007 and has been active in the Network Marketing sector. Prior to network marketing, Silva had been active in the textile sector, and it

had manufactured cloth and exported to many countries for more than twenty years. Being the first microfiber producing company in Turkey, Silva has used this expertise in network marketing.

OUR VALUES

Trust

As Silva, we work with great passion every day to protect the trust bestowed to us by our representatives and customers. We back our products' safety with international certification.

Quality-oriented

We believe everybody deserves a quality life. In order to satisfy our customers, we thrive to make their life easier by offering the best quality products and service all the time.

Success

As the Silva family, we are motivated by success. We wish our partners to enjoy the reward of their success financially and morally by supporting their works.

Sincerity

We sincerely care about being transparent, honest, fair, and respectful in our relations with our Silva business partners and employees.

Naturality

We work to make our product completely natural by investing in the latest technology and the ingredients that can provide the best benefit. That is because we share the wish to live healthy in a healthy environment with great sincerity and respect.

OUR MISSION

Adding quality, trust, and strength to our representative's life with high quality and natural products that make life easier and with our high earning rates.

OUR VISION

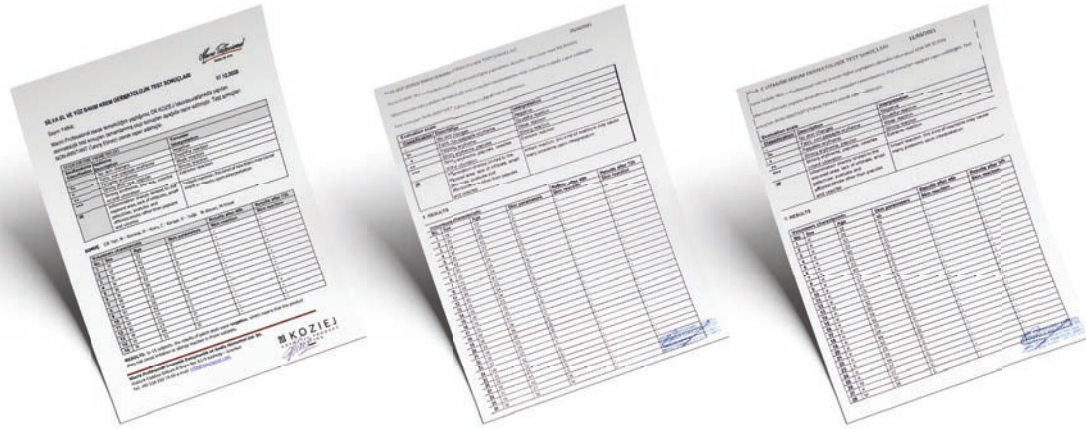

Spreading the success and leadership that we achieved thanks to our representatives in Turkey to the world and put our name to the network marketing sector as a Turkish brand.

CUSTOMER SATISFACTION

Aiming to achieve customer satisfaction while protecting human health and environment, our company backs its reliability with various certificates.

We have been working towards having our place in the world market and increasing brand awareness. We will continue to achieve many milestones with your valuable business partners' support.

Silva Premium Microfiber 100% Better Cleaning Performance

Why Should You Use Silva Premium Microfiber Cloth?

Silva Premium Microfiber contains more than 200 thousand fibers. It can absorb 20 times more water than its own weight.

Fiber can trap stains and liquid in its fiber thanks to the premium microfiber section feature. It cleans the surface completely.

- The most obvious feature of premium microfiber cloth is that it even collects microscopic dust particles that your eye cannot even notice. Thanks to its vacuum feature, the cloth can trap these particles inside of it.

- Fibers of premium microfiber cloth can catch even the most microscopic dirt particles.

- Between premium microfiber cloth and dust, a strong adhesion and attraction occurs when the positive and negative ions meet.

- Those people with allergy and asthma can use Premium microfiber cloth easily as the microfiber cloth does not scatter the dust.

- Premium microfiber cloth requires much less water than when compared to general cleaning cloth. While a normal house cleaning requires an average of 15-20 liters of water, you need no more than 5 litres of water while cleaning your house with microfiber cloth. The microfiber saves water and eliminates the need for using detergents with harmful chemical content. If you still need detergents, you can rely on natural Purimax detergents.

Quality Differences of Premium Microfiber Cloths

- Percentage of polyester and polyamide
- Fibre canals in the yarn

Polyester and Polyamide Ratio

One of the most important details in microfiber is the percentage of polyester and polyamide used. The correct ratio should be planned in the most appropriate way in the weaving technology. The weaving process varies based on the surface it will be used, and it will have perfect results thanks to the correct planning. Silva Premium Microfiber Cloths are manufactured in the most correct ratio with the correct weaving technology and for the most appropriate surfaces.

Deep Cleaning Feature of Microfiber Cloths

When cleaning the surface with general cleaning cloths, the common dust and the tiny particles coming from the cloth remain on the surface. The dust formed in the environment adheres to the particles, and the environment gathers dust quickly and becomes dirty. The general cleaning cloth, in fact, transfers dust from one place to another. That's why the surface becomes dirty quickly and gathers dust.

As the original Silva microfiber cloth can trap tiny dusts inside of it, it can carry out the deep cleaning on the surface. The microfiber cloth consisting of ultra tiny fibres does not leave dust and particulars behind, and that's why dust cannot adhere easily and gather on the surface quickly.

Fiber Channels in Yarn

There are two kinds of Microfiber:

- Original Microfiber (Split Microfiber)
- Imitation Microfiber (Unsplit Microfiber)

Silva Premium Microfiber Cloths are split/original microfibers.

Premium microfiber cloths consist of fibers that are as fine as dividing a strand of hair into 100 equal parts. You know how fine a strand of hair is.

Microfiber fibers, which are unimaginably thin, are one of the most important factors that determines the quality. The more partitions/microfilament fibers there are in the microfiber cloth, the more effective it is at cleaning.

In the market, many microfiber cloths offered are, in fact, unsplit microfibers. They do not possess the cleaning quality. They are short-lived and offer low performance.

How to Protect Microfiber?

- Detergent having harmful chemicals should not be used. Otherwise, microfiber cannot perform its function, its pores get stuck, and microfiber becomes short-lived.

- Our Premium Microfiber Clothes are original, so they show little resistance to heat. They should not be subjected to sunlight or honeycomb radiators.

- They should not be washed in the washing machine. They can be kept in hot water of maximum 40 degrees. You can repeat this process once a month.

- Silva Premium Microfiber has a long lifespan. If you follow the usage instructions properly, you can use the microfiber for a long time.

Premium Multi-Purpose Cleaning Cloth

How can a huge house be cleaned so quickly?

Silva Premium Multi-Purpose Cleaning Cloth is manufactured by using special and different technology. It can clean many different surfaces. Thanks to its special fabric, it can even collect tiny microscopic dust particles. It can trap these particles inside of it thanks to the vacuum feature. It can wipe away dust and dirt on the surface.

You can complete the cleaning in a short time without intense effort. It is a very strong cloth that will let you clean without using detergent. It offers practical and hygienic solutions. Because Premium Multi-Purpose Cloth achieves a clean sweep on surfaces, it takes longer for the dust to gather.

The cloth is hypoallergenic, and those people with asthma and allergies can use it easily. It can absorb 20 times more water than its own weight. It should be used as a damp cloth. It can be used with Purimax natural detergent.

Premium Stubborn Dirt Cloth

How can I remove dried and burned stains without using chemicals?

Silva Premium Stubborn Dirt Cloth, thanks to its high water and oil absorption, is ideal to clean stubborn stains. It does not scratch even the most sensitive surfaces, and thanks to the micro-cellular in its composition, it easily cleans the most difficult oil, dirt, and stains. It absorbs water with its microfiber fabric; and it traps the dirt in the pores on its surface. You can easily rinse the cloth with tap water.

The cloth can be used for teflon pans, steel cooker, and metal surfaces. It easily cleans the built-in kitchen, kitchen counter, oven, dried oil, and food leftovers. When detergent containing harmful chemicals was not used, it is more durable when compared to general dishwashing clothes.

It can be used with Purimax Dishwashing Liquid.

Premium Face Cleaning Pad

How can a face cleaning pad remove makeup and clean skin so easily?

Silva Premium Face Cleaning Pad is an excellent product to remove makeup and clean face thanks to its soft texture and special weaving technique. It is sufficient to use water and a wet pad in order to remove makeup. Thanks to the pad's soft microfiber structure, it removes makeup from the skin easily and cleans leftovers. Water is sufficient to clean the skin. You should not press your skin to clean. Rather, you massage your face with soft and circular movements.

It cleans the skin gently and deeply. With its peeling effect, it helps you get rid of dead cells from the skin. With regular use, the skin remains clean, and black spots do not occur. It opens the pores in the skin and allows the skin to breathe. It supports a healthy appearance by massaging the skin.

Microfiber Mop 3-in-1 Pack

Cleaning is now easier-than-ever!

Thanks to hook-and-loop fasteners for easy cloth change, revolver body, and ergonomic soft sponge, telescopic stick, and wonderful mop cloths are the greatest helper in your house!

Within a short time, easy-to-do yet perfect cleaning is awaiting you.

Once you fasten the cloth to the mop, you need to clean the house by making an "S" movement with the mop. Excluding carpet fabric surfaces, the mop can be used to clean places such as floor, walls, tiles, ceilings, hard-to-reach places (over the cabinet, under the bed base, etc.). Also, you can stick the window cleaning cloth to the circular fixture on the mop body and clean the house in a short time

easily. The mop circular fixture suits Silva's window cleaning cloth.

To clean the mop cloths, you should not use detergents containing harmful chemicals. You can rinse the cloth with hot water, and you should not put different colored cloth in the same case. You can use the cloth with Purimax detergent. Also, the mop pack does not take too much space in your house or office.

Telescopic stick size: 90 cm in a lock position and 156 cm in open position.

Why Silva Microfiber?

Silva manufactures its microfiber with unique knitting technology. This knitting technology is unique to Silva. Microfiber filament yarns are formed by dividing 1 hair strand into 40 equal parts. It is very fine and knitted very tightly. It is highly durable and can be used for years. Polyamide and polyester are used in microfiber. The secret of quality in microfiber is the ratio of polyamide and polyester used.

Microfiber is initially produced to be used in the healthcare areas. In such environments, the use of dust-free cloth is mandatory. Our microfiber cloths collect dust with static electricity because the cloth is positively charged while dust and dirt are negatively charged. In this case, positively and negatively charged particles attract each other, thereby completing the cleaning process. Silva's microfiber is positively charged because of its yarn quality and its ratio.

There is no chemical component in Silva Microfiber so you should not use petroleum-derived harmful chemical detergents with our microfiber cloth. This is because these chemical detergents harm filament yarns. It clogs the pores and cannot perform its function.

Why should you use Silva Microfiber?

The first and foremost reason is your health!

You do not use chemical detergents with Silva Microfiber. All you need is some water. Prominent environmental organizations support the use of such microfiber cloths because there is no chemical and all you need is some water.

Save time and energy!

Silva Microfiber cloths do the cleaning at once without the need for drying and rinsing. Why spend 30 minutes while you can do the same cleaning within 10 minutes with Silva Microfiber? Save your time and energy. Plus, the cleaning lasts longer.

Care sensitive surfaces!

Silva Microfiber is a perfect choice to clean the sensitive surfaces (wood, parquet, laminate, natural stone, marble, wall, door, etc.). No harm or scratch to your precious goods.

Save money!

Silva Microfiber requires less water compared to general cleaning cloth. Save money and water. Plus, the microfiber cloth is highly durable. You can use it for years.

How to Use

Keep Silva Microfiber in hot water for about 30 minutes prior to the first usage. Depending on how frequently you use it, put it in hot water at regular intervals.

NEW

Purimax Natural General Surface Cleaner

You can clean all messes and stains on all surfaces such as floor, wall, glazed tile, corridor, laminated flooring easily with Purimax General Surface Cleaner. It cleans the surfaces and prevents them from getting dust quickly. It is easily decomposed in nature and has a structure that does not harm the environment.

How to Use: Add one cap of Purimax General Surface Cleaner to 5 litres of water to clean surfaces; add ½ cap of Purimax General Surface Cleaner to 1 litre of water to clean glassware and windows.

Do you know?

You can test to see the difference between Purimax Automatic Dish Tablets and the chemical tablets sold on the market. Put the dish tablet containing the harmful chemical in a glass of water. Add an Automatic Dish Tablet to the other glass. Then add boiling water and stir both from time to time.

The Purimax tablet dissolves in a short time, and there is no odor. The other tablet will have a strong odor and a gel consistency. This gel layer helps your dish shine but this is a harmful chemical. To clean this layer, you need 6 tons of water. Do this test and decide for yourself.

Your and your family's health are important to us!

Do another test with a fabric bleach.

Put a small amount of bleach in a teacup. Put the same amount of oxy gel in the other tea glass. Add hair and nails into the bleach and oxy gel.

After some minutes, you will see that hair and nails will disappear. But, this process takes a long time in nature. These hair even clog pipes in your bathroom.

Oxy Gel does not melt your hair and nails. Do not risk nature by using the bleacher and put your loved ones into danger.

Add half a cap of Purimax Powder Laundry Bleach and fill it completely with boiling water to polish, clean and get rid of the yellowness and limescale in your teapot.

After waiting for 15-20 minutes, you will have a clean, bright teapot. In addition, you can get a great result after half an hour by adding half a cap of Purimax Powder Laundry Bleach and boiling water to a bowl to make your glasses, forks, spoons, knives shine and to get rid of stains.

Detergents containing harmful chemicals

Even if you clean the surfaces after using harmful chemicals, they remain on the dishes' surface. This layer continues to increase with the use of intense chemical content on our kitchen materials, laundry, and every item and surface we clean. They penetrate

into our body via breathing, swallowing, and contact with the skin. To clean this layer caused by the dishwashing detergent, you need 6 tons of water. You need 8 tons of water if you will clean the layer caused by the laundry detergent.

So what happens if you are exposed to these harmful chemicals for a long time?

The researches show that many illnesses are caused by these harmful chemicals. It is related to cancer and infertility and has negative effects, such as asthma, throat infection, on the upper respiratory tract.

Turkey spends USD 5,6 billion to cure cancer patients. According to Turkish Health Ministry, if this trend continues, half of a million people will have cancer every year in 2030.

Besides, the harmful chemicals affect not only you but also the environment. Harmful chemicals that do not dissolve in the soil reach the rivers and seas and harm the living creatures living there. Then, as we eat these sea creatures affected by these chemicals, they harm us in the long run.

We can stop this!

For your health, your loved ones, future generations, and all creatures living in nature, let's stop this danger together.

Borax

Borax consists of water, oxygen, sodium, and boron. It is a natural mineral found in soil, plants, and even in our bodies. Boron in Borax has been used for cleaning since ancient times due to its natural structure, no side effects, and is one of the most effective disinfectants. It has even been used for the long-term storage of food. It has the ability to destroy bacteria and viruses in foods. It also disinfects them. It is an excellent disinfectant with its antiseptic, antifungal, and

antibiotic properties. Borax, which is frequently used in house cleaning, also softens the water by reducing the limescale.

Boron, which is a very important natural resource for Turkey, is found mostly in our country in the world. It is also a national pride for us to use Turkey's mines.

Why should we use Purimax?

Your health and life quality are important for us. Our products make your life easier and offer quality and trust. Do you know that the harmful chemicals and detergents containing petroleum derivatives harm your body's organs since they penetrate your body easily? Do you know that if you want to rinse your goods and clothes that you washed with these chemicals, you need tons of water? Do you know that these chemicals do not dissolve in soil and nature and they reach rivers and sea and harm sea creatures? Do you know that when you eat sea creatures, you harm yourself?

In order to stop this danger, we, Silva, produced Purimax detergents with borax, halal certificate, and natural content. Halal certification is a comprehensive study that confirms the production is in accordance with halal standards. The products pass certain tests both in Turkey and in European standards and are subject to inspection. We use borax in our detergent because it is Turkey's natural resource, one of the most effective disinfectants, and a perfect cleaner.

Silva products are friendly to your health.

Eyebrow and Eyelash Serums

Silva Eyebrow and Eyelash serums strengthen and care eyebrows and lashes with substances they need. They strengthen brows and lashes, prevent losses, and affect their growth with regular use.

Lash serum helps strengthen, lengthen, and thicken eyelashes. The eyebrow serum helps to tighten the hair follicles and fill the gaps. It cares the hair follicles from bottom to top and helps you have better brows and lashes. Vitamin A, B, and E found in the natural structure of argan oil and almond oil are very effective protein sources. They are dermatologically tested. It helps these proteins to reach all lashes and brows with its special-designed brushes. Once you clean the eye and brow region after the makeup, you can apply it to clean and dry hair follicles.

You should apply it in the morning and evening with its special brush.

Almond Oil 100% Organic

Silva Almond Oil provides moisture for the skin and cleans your skin.

The oil extracted from edible almonds helps to purify the skin from its dead cells and moisturize the skin. Its rich Vitamin E helps you have bright skin. It can be used to strengthen the nails and for chapped lips. Silva Almond Oil strengthens and repairs the hair. It is convenient for all skin types.

How to Use: To moisturize the face, use 2-3 drops of almond oil to clean skin in the morning and evening, then apply it while massaging with your fingertips; the skin absorbs almond oil easily. Apply almond oil to your slightly damp hair and spread it all over your hair; massage your scalp. After keeping it on your hair for 40 minutes, rinse your hair.

Collagen Serum

Collagen is found naturally in our skin, and as we age, collagen production slows down. It is an essential structural protein for our entire body. As we age, it decreases. With its decrease, problems such as dried skin, loss of elasticity, sagging, wrinkles, etc. occur.

Silva Collagen Serum helps the skin to look young, reduce wrinkles, and make the skin look lively and plump. Also, it supports the skin. It helps to maintain the oil, acid, and moisture balance of the skin. It supports the formation of new cells and helps smooth the skin.

There is hyaluronic acid inside of Silva Collagen Serum. Hyaluronic acid is a natural molecule that decreases as we age. It is important to keep the hyaluronic acid level in order to prevent aging of the skin. It traps moisture in the skin and ensures that the moisture stays for a long time. It helps to tighten the skin, prevent wrinkles, support the formation of collagen fibers, and prevent acne.

Argan Oil 100% Organic

100% natural argan oil is ideal for both skin and hair care. Argan oil is a completely additive-free and natural product. It contains Vitamin A, C, E, and polyphenols, linoleic acid, and Omega-6 in its natural structure.

When used for the skin, it helps moisture, nourish the skin, and prevent wrinkles. It helps prevent the skin from aging, increase the skin's elasticity, balance the oil sebum naturally produced by the skin, and prevent acne formation in regular use. Argan oil helps strengthen the strands, prevent splitting, nourish the hair, and give the hair a natural bright. It is very effective against the chapped lips and helps make lips soft and smooth.

How to Use: To moisturize the face, drop 2-3 drops of argan oil to clean skin morning and evening by massaging with fingertips. It is easily absorbed. It is convenient for all skin types.

Eye Contour Care Serum

Factors such as our daily routines, mimics, and external effects make our eye contour look tired, cause ring and swelling, and wrinkles. To increase elasticity as we age, it is essential to use the eye contour care serum. You can apply to it under and around the eyes. Silva Eye Contour Care Serum helps to moisturize and illuminate the eye area. In case of regular use, it helps to remove wrinkles, fine lines, crow's feet and under-eye bags around the eyes. Also, it is effective on melanin pigment. It mitigates the color darkening. In addition, thanks to the herbal extracts in its content, it helps to reduce and moisturize the wrinkles around the eyes.

How to Use: Clean the eye area and face. Apply Silva Eye Contour Care Serum (1-2 drops) to fingertips. Apply the serum around the eyes with light circular motions. Apply it to a clean face every morning and evening. It is convenient for all skin types.

Anti-Blemish Serum

The fundamental reasons behind the skin spot are polluted air, malnutrition, genetic structure, birthmark, excessive sun exposure, acne scars, age spots, and hormonal changes. The skin spot especially makes people unhappy.

Anti-Blemish Serum helps to decrease the skin's pigmentation disorder (accumulation of coloring matter in an organ or organism), hyperpigmentation (spot caused by pigment accumulation) and age spot. To decrease the spot, it is recommended to use Silva Anti-Blemish Serum on a regular basis. After regular use, you can see the effect after 4 weeks and its effect can be noticed. In addition, it helps to repair, moisturize, nourish the skin and increase the skin's collagen production. It should be applied every morning and evening after cleaning the skin.

Massage outward from the center of the face and apply towards the forehead, nose, cheeks, and chin. It is convenient for all skin types.

Vitamin C Face Serum

Hyaluronic Acid and 10% concentrated Vitamin C

Silva Vitamin C Face Serum helps strengthen the skin barrier and decreases the fine line, wrinkles, and brown spots and tighten the skin. It helps the skin to clean the dead cells and looks bright. Containing 10 percent concentrated Vitamin C, it helps the skin to achieve the moisture balance it needs and helps to lighten and smooth it as a result of regular use.

Because the anti-aging feature of Vitamin C is very effective for anti-aging care. It helps the skin to gain a more vibrant appearance. The hyaluronic acid that our skin needs helps to give the skin a tight and healthy appearance and mitigate skin problems. Since it can hold a lot of water because of its structure, it helps the skin layers to look smoother and moist and moisturizes the skin. It helps to form and protect collagen fibers, renew and repair cells, make the skin look younger and prevent wrinkles from forming.

Intensive Care Cream

Silva Intensive Cream contains Vitamin C, Hyaluronic acid, and Collagen. Collagen is found naturally in our skin, and as we age, collagen production slows down. It is an essential structural protein for our entire body.

Silva Intensive Cream helps the skin to look young, reduce wrinkles, and make the skin look lively and plump. Also, it supports the skin. It supports the formation of new cells and helps smooth the skin.

Hyaluronic acid is a natural molecule that decreases as we age. It traps moisture in the skin and ensures that the moisture stays for a long time. It helps to tighten the skin, prevent wrinkles, support the formation of collagen fibers, and prevent acne.

Because the anti-aging feature of Vitamin C is very effective for anti-aging care, it helps the skin to gain a more vibrant appearance. Also, it helps regain the skin's elasticity and flexibility. It acts as a barrier on the skin and protects the skin. Convenient for all skin types.

Natural Coconut Oil

Silva Coconut Oil is produced with cold press technique.

In Cosmetic: Coconut Oil is the most natural and perfect moisturising for the skin. The medium chain oil acid within coconut oil has antibacterial features. It helps regulate the skin's pH balance and protect the skin from external factors. It helps mitigate skin problems, prevent acne formation, prevent harmful microorganisms, and prevent under-eye bags. Also, it repairs hair and helps it to grow faster. Also, it helps prevent hair loss. It can be used in nail care, hair care, skin care - for all care needs.

For Face: Apply it to your clean face with massaging.

For Hair: Its liquid form can be applied to your hair evenly. Then, wait for 2 hours and wash your hair.

For Food: Coconut Oil is a very rich oil in terms of nutritional value. It contains saturated fats like lauric and myristic acid. When consumed, it turns into energy very quickly. It helps metabolism speed up. It is a source of antioxidants. Its liquid form can be used for salad while its solid form can be used as butter. It can be added as cream to coffee. Coconut oil gives a nice taste and smell thanks to its pleasant aroma. For this reason, using it in many foods provides benefits in terms of taste and health.

It gets solid under 24.5°C degrees. There is no need to keep it in the refrigerator.

Extra
Moisturizing

Body Spray Japan Cherry Blossom

Extra moisturizing body spray leaves a pleasant scent on your skin thanks to the Japanese Cherry Blossom notes' wonderfully light and refreshing effect. Beside the pleasant scent, it also helps you to meet the moisture your skin needs and make you feel fresh.

It is easy to use and practical. You can use it following every shower and whenever you need during the day. It is ideal to use after the shower. The body loses its moisture during the shower, and the extra moisturizing body spray provides the moisture and refreshes you.

Cherry blossom is the scent of white and light pink flowers that bloom in spring. Enriched with fruity musk, it turns into an impressive scent. The pure and delicate nature of cherry blossoms meets with your skin and leaves a sweet and elegant scent.

It is recommended to use the spray from a distance of 15 cm from your body and apply it as a message and wear your clothes when the spray gets dried.

Paper Soap

Our hands are the organs that contain the most bacteria as they provide all kinds of connections with the environment. Also, these bacteria, such as hepatitis A, Sars, common cold, and Avian Influenza, may lead to the progression of many fatal diseases. That's why it is very important to clean our hands.

Silva Paper Soap is very practical, and you can take it everywhere, such as school, office, picnic, travel, etc. Particularly children can keep their hand sanitized with the paper soap. As the paper soap is for personal use and disposable, it protects your personal hygiene. Shared soaps are likely to contain viruses and have an infectious effect. Silva paper soap is disposable. It melts in your hand while washing your hand.

When your hands are dry, pick a piece of paper soap; wash your hand with this paper soap. It will give your hands softness, hygiene, and pleasant smell. Keep away from heat and moisture, store in a dry and closed place.

There are 20 pieces of paper soap in a pack.

Natural Propolis Toothpaste

Silva Natural Propolis Toothpaste provides mouth and teeth cleaning. Thanks to the special herbal actives in its content, it helps care and strengthen teeth and gums. It helps whiten the teeth without eroding the enamel. Propolis helps prevent the formation of caries, plaque, and tooth infection.

Allantoin in its content helps heal wounds in the mouth. Since the Sorbitol in its content is metabolized for a very long time, the pH of the plaque does not decrease, and it helps reduce the risk of caries formation.

Xylitol in its content helps prevent oral bacteria and tooth decay. Xylitol reduces the number of Streptococci (bacteria) in dental plaque and saliva in long-term use; it creates a refreshing effect in the mouth. It can be used by people with sensitive gums.

Nano Toothbrush Active Carbon Effective

Silva Nano Toothbrush helps protect natural teeth whiteness and provide dental and gum care thanks to its specially designed active carbon brushes. The activated carbon helps balance the oral flora. There are no animal additives.

Silva Nano Toothbrush's fiber is produced out of natural carbon-doped filaments, and the nano technology has been utilized to provide high performance. Since the 0.01 mm thick fiber tips are not cylindrical, the cleaning power is increased. Because of the elasticity of the brush fibers and the right hardness, it does not harm the gums and tooth enamel.

While active carbon effective fibers help protect teeth and gums, the ergonomic design of the toothbrush helps safe usage. Adults and children can easily use it.

Toothbrush is sold with a protective cap.

Ironing Board Cloth

Ironing Board Cloth traps the steam inside so you can iron easily and smoothly. As the ironing board has fabrics that contain asbestos, it produces carcinogenic substances, thereby harming human lives. However, Silva's ironing board cloth does not have asbestos. It is of high quality and 100 percent polyester. The mat's thickness under the cloth is a proof of this quality.

This mat, unlike sponge, does not keep the steam which turns into water when cold. This prevents the mat from staining the clothes. It absorbs the steam, and it remains dry and clean.

How to Use: The elastic thread inside the pipe is stretched and fixed on the table. It is suitable for all sizes of ironing boards as it has elastic pipe and inner thread. It can be washed at 30°C.

Mat Thickness: 5mm.

Size of ironing cloth: 50*140 cm.

Attention: Keep the ironing board cloth away from high heat. If so, there could be burns and adhesion. Suitable for steam iron. Nevertheless, keep away from high degrees of steam. Do not leave the iron on the ironing cloth. If left unchecked, the iron can burn the cloth. Nevertheless, the cloth will not catch fire.

Silva Ironing Water improves the ironing and prevents lime, thereby helping you easy ironing. That's why it has a special formula.

Why Should I Use Silva Ironing Water?

The tap water eventually causes lime in the iron, thereby causing water leakage. The lime stains your clothes and decreases the ironing performance. Silva iron water prevents the iron from getting lime.

How to Use:

Pour Silva ironing water into the steam iron's tank and use it. Also, there is no need to add water.

Nano Super Eraser

Nano Super Eraser has small and big pores. Thanks to its special structure, it shows a high level of performance against the most stubborn dirt. Before using, clean the surface with a damp cloth. Do not use detergent. Just water is enough. Without applying too much pressure, clean the surface with circular movements. Nano Super Eraser will erode just like normal erasers. The eraser may shatter when rubbed on sharp edges or porous surfaces.

Where to Use: You can use Nano Super Eraser for marks, paintings, and stains on walls and surfaces, steel, silver, inox surfaces, oily metals in built-in, hob, and oven, tiles and grout, sockets, some ink stains on walls and fabric floors, sticky dirt, blinds, wooden, and metal frames, office tools such as computers, printers, fax, and telephone. It should not be used on unglazed furniture and furniture not covered with paint.

Tea Brewing Bag

100% Natural, 100% Easy
Silva makes your life easier

You can brew tea without clogging your washbasin and staining your tea pot. All these are thanks to Silva Tea Brewing Bag. It is made of 100 percent natural paper. Does not contain chemical substances. You can save water. You can use it for powder tea and herbal tea. Friendly to the environment. You can save time. Once the tea is brewed, you can remove the tea bag and dispose of it. Then, you can use very little water to clean the tea pot.

You can add a spoon of tea to the tea bag. (10-15 grams of tea per person). There are 30 tea bags inside a pack.

How to Use:
Put some tea and close it. Place it inside of the teapot vertically. When you pour water, the tea bag is sealed.
